Sen. Brown announces \$4 million loan awarded to Clinton to build wastewater treatment plant

LANSING – The village of Clinton will receive a \$4 million loan for the construction of a new wastewater treatment plant, announced state Sen. Cameron S. Brown, R-Fawn River Township.

The funds will allow the village of Clinton to build a new 425,000-gallon-per-day oxidation ditch wastewater treatment plant.

“This is wonderful news for the village of Clinton and our environment,” Brown said. “We need to do everything in our power to protect the quality of our water.”

The Department of Environmental Quality issued their “Order of Approval” for the money to be paid out from the State Revolving Fund earlier this week.

“I am glad to see the funds appropriated for the construction of this greatly needed treatment plant,” Brown said. “I commend the village of Clinton for being environmentally responsible and forward thinking in their pursuit to build this wastewater treatment plant.”
